WHAT TO CONFIRM BEFORE ORDERING

- The cooling effect is dose- and particle-size dependent; taste in the final matrix.
- Check the moisture and the particle size, not only the assay.
- Erythritol is not a reducing sugar; it does not brown in the same way as glucose or fructose.

> **Indicative document.** This sheet describes the grade we can quote; it is not a batch COA and does not confirm a result for a specific lot. Final specification, contaminant limits and documentation are agreed in writing before the order. The identity, assay basis, profile and method are release parameters, not marketing descriptions.
